WMI is licensed by Professional Engineers Ontario and authorized to provide professional engineering services and designated as a Consulting Engineer.

Collier Centre

Barrie, Ontario

COLLIER
CENTRE

Collier Centre, in the heart of Barrie's downtown core, is a proposed mixed use development by Mady Development Corporation. The project incorporates a commercial tower, a residential condominium building and street level retail. Located adjacent to City Hall, at Mulcaster and Collier Streets, Collier Centre is ideally situated to enjoy spectacular views of Kempenfelt Bay.

WMI prepared site servicing, grading design and obtained approvals from the City of Barrie. Included in the detailed design task are the stormwater management control features that will assist the development in achieving LEED Silver standards. Construction on the project began in 2012 and is anticipated to be completed in 2015.
