

WMI & Associates Land Development & Infrastructure Engineering

Deerhurst Resort

Village Centre

Skyline has undertaken further development of this premiere resort property located in the District of Muskoka. The expansion includes a Village Centre comprised of residential and retail space. The Village Centre is a proposed mixed-use development located to the south and west of the existing Deerhurst Resort Pavilion and Sportsplex Centre. It comprises approximately 600+ condominium units, 11 townhouse units, a 144 unit hotel complex with over 4,000 sq. m of retail.

The development is defined by three separate sub-development areas known as the West Riverfront Lands, Plateau Lands, and Driving Range Lands which replace existing Deerhurst Resort open space lands, horse riding stable lands, and Driving Range lands, respectively. The entire development area is surrounded by the existing Deerhurst Resort Lakeside golf course.

To meet the servicing design requirements and municipal/provincial approvals WMI was retained to provide engineering services including preparation of a Master Servicing & Stormwater Management Report and a Traffic Impact Study.

CLIENT BASED SERVICE

WMI is a proud member of the service industry. Our goal is to provide exceptional service to exceptional clients.

ENGINEERED SOLUTIONS

Simple to complex. WMI provides solid engineering solutions for a wide variety of development related issues.
